AI-ASSISTED BUILD · SIDE PROJECT

AUTO RASH

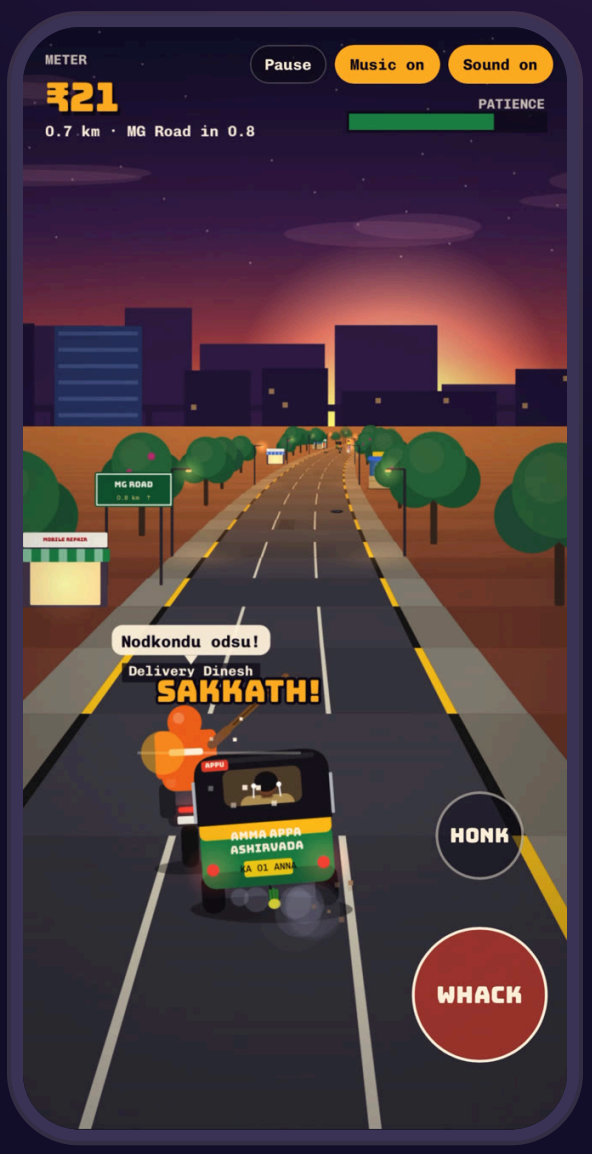

Road Rash, but you're a Bangalore auto driver. Majestic to Silk Board. Meter on, patience low.

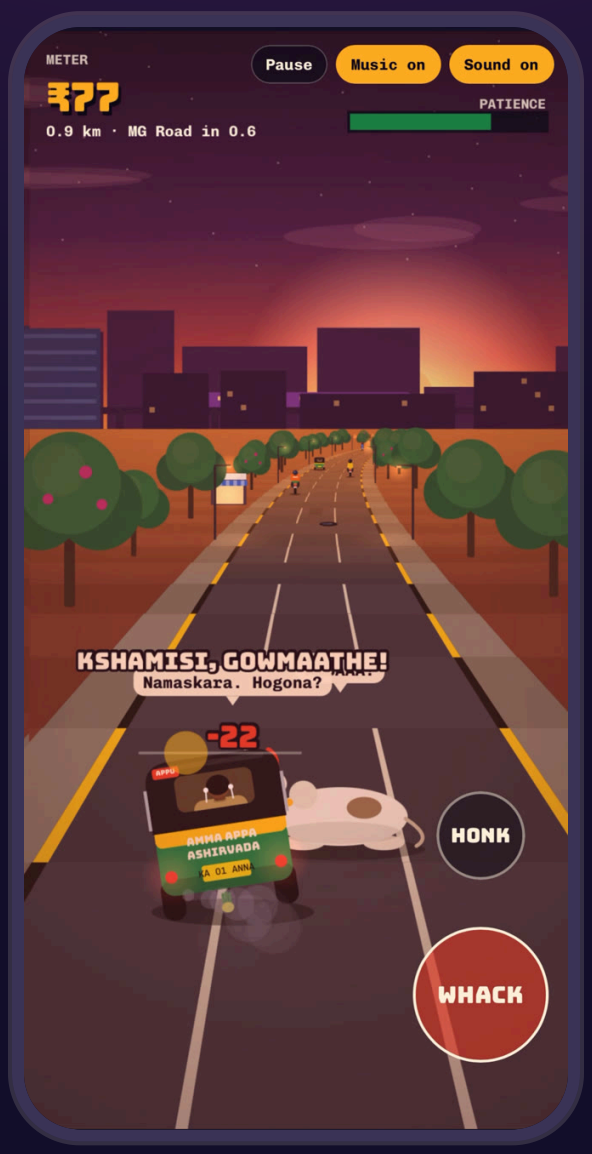

gobicat.itch.io/auto-rash

THE GAME

BANGALORE TRAFFIC, BUT YOU FIGHT BACK

Whack rivals with a lathi. Knockouts add to the fare.

Never the cow. Anna stops mid-swing and says sorry.

Scooty Shwetha is filming a reel. In your lane.

10 Bangalore areas

Metro, flyovers, Silk Board jam

Kanglish banter

HOW IT WAS BUILT

I DIRECTED. THE AI CODED.

I OWNED

- The idea, the jokes, the feel
- Game design and what to cut
- Playtesting on real phones
- Security and privacy calls
- Every release decision

CLAUDE CODE

- Wrote the code
- Mocked ideas before building
- Ran automated browser tests
- Profiled and fixed bugs
- Set up deploys and checks

Play on my phone → Record what's off → AI finds the cause → Tests pass → I say ship

FOUND BY PLAYING, FIXED WITH AI

REAL BUGS, REAL FIXES

IPHONE FROZE ON THE FIRST HIT

Safari built its audio tables the first time a sound played.

→ Warm up audio silently on the menu.

GHOST TRAFFIC

Buses and bikes drove straight through each other.

→ Weight-based bumps. Drivers shout "Insurance ide tane?"

DESKTOP CAMERA

On wide screens the auto blocked the road ahead.

→ A separate wide-screen camera. Phones untouched.

METRO TO NOWHERE

The metro line started and ended in mid-air.

→ Stations at the start, curving away into the city.

FOOTPATH GHOST LANE

You could drive through lamp posts and people.

→ Poles, walkers and dogs now react. DHAMAK!

REDDIT BLOCKED THE LINK

netlify.app links are banned sitewide on Reddit.

→ Moved to itch.io, auto-published from GitHub.

Mostly caught by playing on my own phone

UNDER THE HOOD

SMALL GAME, GROWN-UP SETUP

LEADERBOARD

Firebase, with anti-cheat rules on the server: score caps, ride timer, rate limits.

PRIVACY

Nickname and score only. Anonymous accounts. Players can delete their data.

SECURITY

Strict content security policy. A+ on securityheaders.com.

SHIPPING

One push to GitHub publishes to the web and itch.io automatically.

COST

Free tiers only, with no way to run up a surprise bill.

TECH

Plain JavaScript and Canvas. Sound effects made in code. Works offline.
